

A Report on Environment Day

World Environment Day is celebrated on the 5th of June to bring about awareness among the people, to take care of the Earth and the environment.

Besides our rivers, green plants are very important to the human environment. They help in cleaning the air by removing the carbon dioxide from the atmosphere and giving out oxygen, which is essential for all living organisms.

The Pre-Primary section celebrated the Environment Day on the 10th, 11th and 12th of June. The children of Sr.Kg, Jr.Kg, Nursery and Montessori were thrilled and excited to water the green plants at our school lawns, with the help of watering cans.

The children had learnt the importance to preserve and conserve their nature.
