The students had visited BBMP Park in Koramangala, It was an enriching experience for the children as they could have a break from the monotony of their regular classes. The Trip was a great experience for the children as they were able to get fresh air and enjoyed themselves by playing in the swings, slides and see-saws. The children were able to interact with each other outside a classroom setting which would help them with social interaction.

The children were exposed to a wide variety of plants and trees, this change of scenery and pace would most definitely have a positive impact on the children. This helped them have a better and positive understanding of nature and help them improve their social skills and have a better respect for nature.

This was a wonderful trip for both the teachers and students.
