

NOTICE FOR CLASS VIII

“Silent Spring” Written by Rachel Carson and published in 1962, substantially altered the course of history. Most immediately then it saw to the withdrawal of the use of DDT being air - dropped as a pesticide worldwide.

This signaled a paradigm shift in our understanding of our environment as indispensable to the support of life on our planet. This in simple terms, led to the development of the subject “Environmental Science” which has gained a lot of attention and traction in the 70’s and 80’s and in our school more recently.

We at St. Francis ICSE have decided to expand the options our students have in choosing the study of ‘Environmental Science’ as a subject for the ICSE examination from 2022 onwards.

We hope that the introduction of this subject for class IX & X, apart from providing another option from Group II, will also discover another Greta Thunberg in our midst who at Davos said, “Your Inaction is fuelling flames by the hours” in acting with climate change.

For further details and for any further clarification you can meet the Academic Supervisor.

NOTE: Kindly fill the details and email the acknowledgment sheet by 4th March 2022 to sfsleena@stfrancisschoolicse.com

St. FRANCIS SCHOOL – ICSE
Koramangala, Bengaluru – 34.

ACKNOWLEDGMENT

Dear Principal,

We, the Parents of _____ of Std VIII Sec_____ have understood the subjects offered by the school management. We are also aware that no change of subject/s will be permitted once opted and confirmed.
